8-BITS, 16 MHz - \$479

THE WORLD'S LEAST EXPENSIVE
COMPLETE VIDEO A/D's

For
vector?

Due to the broad acceptance of our MATV Series Video A/D Converters, with thousands of units shipped worldwide, Computer Labs is pleased to announce this dramatic price reduction on the entire line of video A/D Converter products shown below. The prices shown represent a reduction of almost 50% from previously published prices.

Computer Labs has been acknowledged to be the world leader in supplying "complete system solution" A/D's and D/A's for over ten years in such areas as video, radar, and other high-speed digitizing fields. Some of the other A/D's on the market require many extra expensive parts for operation. The MATV Series A/D's are completely self-contained including internal track-and-hold, timing, voltage references, and feature direct 1 V p-p input range with TTL compatibility. These A/D's are covered by a one year warranty and are fully repairable.

Enclosed you will find complete data sheets on the MATV Series A/D's and the companion D/A Converters designed to complement them - the MDD Series. If you have any questions regarding any of these products, please feel free to give us a call.

Deliveries of any of these products is stock to four weeks. Prices are F. O. B. Greensboro, North Carolina.
